1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 4, drawn to a reflective pavement marker, classified in class 404, subclass 16.
- II. Claim 7, drawn to a method of making a pavement marker, classified in class 264, subclass 1.9.

The inventions are distinct, each from the other because:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by other methods such as casting—ie, injection molding need not be used. Also, the product does not require the instant step of hardcoating and using a means for applying an abrasion resistant hard coat.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
